How to view or print documents

The documents on this page are Adobe PDF documents. As PDF documents they should be readable on any laptop, computer, tablet or phone.

You will notice that many of the booklet documents are designed to be printed as a booklet. If you wish to do this please ensure that your printer settings are set to **'print on both sides of paper'** and **'flip on short side'**. Although slightly less straight forward to read on a device all of the pages should be readable even if they are slightly in the wrong order.
